

# Sealed Air®

BRAND PROTECTIVE PACKAGING

## ProPad Mini Paper Cushioning System

SEALED AIR® brand ProPad Mini crimps and cuts paper to make compact cushioning pads in a flexible, easy to set up format.

## BENEFITS

### Operational Efficiency

- Small footprint requires minimal space for machine and paper infeed
- Quick, consistent dispensing at sizes as small as 6" long, 6 output angles to align with operator position
- Various set-up options from shelf to table to freestanding
- Creates custom-length paper pads at speeds up to 120 ft per minute
- Paper infeed design for fast material changeovers

### Product Integrity

- Padded paper delivers outstanding protective performance
- Fills void and holds product in place, preventing movement during transit

### Package Optimization

- Dispenses in manual, auto-repeat, and preset modes to help deliver the desired pad size on demand

### Brand Experience

- Paper packaging material is curbside recyclable for added consumer convenience
- Available in 100% recycled paper packaging material

## CHALLENGE

When e-commerce or fulfillment operations must protect heavy, bulky items, it can be challenging to match the heavy-duty shock absorption and void fill of foam or plastic films with sustainable alternatives. And with labor optimization an ongoing concern for most manufacturers and shippers, any new equipment must be versatile, intuitive, and easy to learn. Can fulfillment teams adopt a sustainable cushioning system that delivers industrial-grade protection while streamlining workforce training and productivity?

## SOLUTION

The SEALED AIR® brand ProPad Mini Paper Cushioning System is easy to use and creates, custom recyclable paper pads as short as 6" long for lofted void fill and cushioning. Designed for all types of pack stations with multiple stand configurations. Paper options are made from 100% recycled content which helps businesses achieve outstanding product protection while also achieving sustainability goals.

## ProPad Mini Paper Cushioning System

### SUSTAINABILITY

- Paper materials are curbside recyclable
- Available with 100% recycled content material
- Uses less paper than competitive options, generating less waste
- Replaces non-recyclable materials like foams and plastic films

### MATERIALS

- Engineered to be used with SEALED AIR<sup>®</sup> brand 30# - 44# 1-ply or 30# 2-ply fanfold paper
- Custom-length pads produced at up to 120 pads per minute

### EQUIPMENT

Small footprint with 5 different mounting configurations for adaptable installation leading to easy operator use

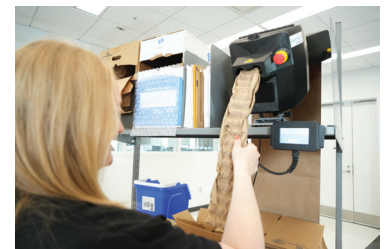

- Paper infeed for fast, easy changeovers
- Easy-to-use touchscreen interface with repositionable pendant
- Four operating modes:
  - Manual
  - Auto-Repeat
  - Batching
  - Programmable Presets

### APPLICATIONS

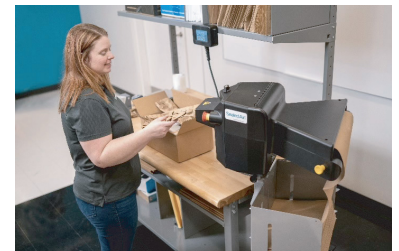

- Ideal for 3PL pack stations, fulfillment centers
- Suitable for e-commerce and shipping applications such as:
  - Consumer Goods
  - Automotive
  - Electronics
  - Industrial Supplies
  - General Fulfillment
  - Warehousing and Transport
