

Foam-in-Bag Packaging System

Instapak Simple®

The Simple Solution for High Protection

The SEALED AIR® brand Instapak Simple® foam-in-bag packaging system is our easiest to use foam-in-bag platform, merging the premium performance of Instapak® foam packaging with an on-demand delivery system that requires minimal training and service.

- Just-in-time – foam is expanded on site ensuring the right amount of material is used every time
- Product protection – high cushioning abilities that provide maximum protection with the minimum amount of material
- Space saving – on demand packaging solution that saves valuable warehouse space

MINIMUM TRAINING AND MAINTENANCE

The foam-in-bag system is lightweight, easy to install and requires minimal maintenance, making it ideal for operations producing less than 20 packs a day. The Instapak Simple® system delivers foam filled bags on demand without the need for manual mixing or individual bag loading. It can easily be moved to any packaging locations.

MINIMAL INVESTMENT

Foam components are delivered in easy to handle containers, reducing the need to buy and store bulky packaging materials.

FEATURES

What sets the Instapak Simple® system apart from other foam packaging systems?

- Powered through a standard electrical outlet
- Pre-set push button operation
- Small 9.5 litre containers, easily positioned into place
- Low maintenance
- Plug and play
- Compact, mobile platform
- Minimum training required

Foam-in-Bag Packaging System

SUSTAINABILITY

- Instapak® foam expands on-demand and on-site freeing up valuable warehouse space and reducing the number of delivery trucks with associated costs and emissions
- A custom-shaped cushion is created within the carton, that absorbs bumps and bruises during the entire shipping process which highly reduces shipping damage and the consequent need to ship replacement products
- The foam provides the right amount of packaging material to protect the product which optimises transportation with smaller cartons
- Instapak® cushions can be reused as carton fillers or reshaped manually to fit the next product shipped

SPECIFICATIONS

Electrical

100-240V, Single phase, 1.9A, 56/60Hz

System dimensions and weight (H x W x L)

86,2cm x 69,9cm x 38,1cm - 43kg

Component weights

A: 12kg / B: 10kg / Film: 3kg

For important operating and safety information, please see the "Recommendations for the Safe Use and Handling of Instapak® Foam-in-Place Components" guide.

TYPICAL APPLICATIONS

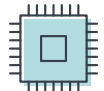

The versatility of the SEALED AIR® brand Instapak Simple® is suitable for packing a vast range of products.

Automotive

Industrial Component

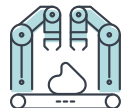

Electronic

Work Cell Operations

Medical Equipment

General Manufacturing

Home Goods
