

Disruptive Technology That Won't Disrupt Your Operation

Introducing the **NEW** BUBBLE WRAP® Brand Universal Inflation System

Disruptive technology shouldn't derail your business. From the packaging experts you know and trust at Sealed Air, comes the latest innovation in inflatable packaging. The BUBBLE WRAP® brand universal inflation system is the new industry-leading inflator that will immediately transform your operation to optimize labor, meet growing and changing business needs, reduce packing errors, and increase operational efficiency.

1 INFLATOR, OVER 80 TYPES OF PACKAGING MATERIALS

Key Benefits

INDUSTRY-LEADING

Inflates over 80 types of BUBBLE WRAP® brand materials including cushioning, pouches, and air pillows.

SMART

Smart technology automatically detects and configures the machine to the right seal temperature, airflow, and pressure based on the material loaded — no programming required.

VERSATILE

Effortlessly switch from one material type to another based on your needs.

ERROR-FREE

No training is required. Automatic system configuration alleviates the need for operator interaction and reduces the risk of operator error, which helps with quality control and mitigates consumer complaints.

FAST

Inflates materials at speeds up to 80 linear feet per minute for greatest throughput. Faster inflation of packaging materials makes your packers more efficient, fulfillment lines more productive, and gets more packs out the door on time.

ADAPTABLE

Ideal for a broad range of markets and packing environments, from ship-from-store to e-commerce fulfillment centers.

COMPACT

Supports a wide range of accessories and mounting options to save space and optimize your pack station. It's also 53% lighter and up to 20% quieter than other competitive systems.

SAFE

Does not use any knives in the inflation process and has an industry-leading emergency stop feature for operator protection and safety. The universal inflation system is CSA, CE, PSE, and FCC certified.
