

EQUIPMENT PRODUCT INFORMATION

AUTOLOAD 75

HIGH-SPEED AUTOMATIC BAG LOADING SYSTEM

DESCRIPTION

The CRYOVAC[®] brand AutoLoad 75 is a high-speed, fully automatic bag loading system designed for dairy and smoked and processed meat applications. By automating bag advancing, opening, and product insertion, the system eliminates manual, repetitive loading tasks while delivering consistent, efficient throughput. Engineered for seamless integration into CRYOVAC[®] brand rotary vacuum chambers and shrink tunnels, the AutoLoad 75 helps processors improve labor efficiency, enhance product presentation, and maintain consistent packaging performance throughout production.

KEY BENEFITS

OPERATIONAL EFFICIENCY

- Increase line throughput and reduce manual labor with fully automatic bag advancing, opening, and high-speed product insertion
- Maintain consistent production rates with performance up to 45 packages per minute depending on product size and application
- Improve worker safety and reduce ergonomic strain by eliminating repetitive manual bag loading
- Adapt quickly to changing production demands with the ability to run a wide range of product shapes and bag sizes
- Reduce downtime during product changeovers using quick-change tooling
- Streamline sanitation and cleaning with stainless steel construction and full washdown capability
- Speed up maintenance with toolless removable belts

PRODUCT INTEGRITY

- Protect products from environmental exposure when paired with CRYOVAC[®] brand shrink bags
- Maintain freshness, color, and flavor throughout distribution when integrated with CRYOVAC[®] brand vacuum shrink packaging systems

BRAND EXPERIENCE

- Deliver consistent finished packages through uniform, automated bag loading
- Support premium product presentation by preparing products for optimal vacuum and shrink performance

TECHNICAL DATA

MACHINE DIMENSIONS

Max Length	240.8" (6116 mm)
Width	32.1" (816 mm)
Height	75.2" (1910 mm)

WEIGHT

Weight	3100 lbs (1400 kg)
--------	--------------------

OPERATORS

Required	1 to monitor only
----------	-------------------

PRODUCT DIMENSIONS

Length	2 - 9" (50 - 250 mm)
Width	Up to 21.7" (550 mm)
Height	2 - 6" (50 - 170 mm)
Weight	0.5 - 15 lbs (up to 7 kg)

BAG DETAILS

Width	5 - 14" (130 - 350 mm)
Length	8 - 23" (200 - 600 mm)

SPEED

Working Speed	Up to 45 PPM
---------------	--------------

Speed is dependent on packaging size, product viscosity, and film type

UTILITIES

Air	0.6 MPa (6 bar), 25 CFM, 1/2" dia. line
Electrical	3-phase, 400/460 V, 50/60 Hz

LINE LAYOUT EXAMPLE
