

PROPAD® HORIZONTAL PAPER CUSHIONING SYSTEM

Transform your packaging line with the ProPad® Horizontal — the paper cushioning and void fill solution designed for today's fast-paced operations. Built for conveyor lines and work cells, it delivers high efficiency, operator comfort, and sustainability, all while saving valuable floor space.

COMPACT, POWERFUL, AND PURPOSE-BUILT

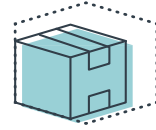

- **Space-Saving Footprint**
Fits seamlessly into tight areas —ideal for high-density packing zones. No trolley or paper pallet close to the equipment, it works directly over pallets with Endless Fanfold Paper for uninterrupted productivity.
- **Operator-Centric Ergonomics**
Designed to reduce strain—upright paper loading eliminates heavy lifting. Intuitive interface with magnetic HMI (Human Machine Interfaces) display for flexible placement (left or right side).
- **Smart Automation, Smarter Output**
Four versatile operating modes: Manual, Auto Repeat, Batch, and Sequence. Reduced loading frequency increases throughput while lowering labour intensity. Real-time feedback with bin-full sensors and stack lights keeps your line moving.

PREVENT PRODUCT DAMAGE

Ensure secure packaging for optimal product protection with consistent, high-performance cushioning that absorbs impact and prevents damage in transit.

OPTIMISE PACKAGING

Preserve and protect the integrity of fragile products with packaging techniques (wrap cross, criss cross, etc) that minimise the use of paper material.

STREAMLINE OPERATIONS

- Save valuable time with an intuitive system that improves productivity whether you use centralised or online production.
- Continuous feed via Endless Fanfold Paper reduces downtime and cuts handling costs, keeping your line running smoother and faster and your team focusing on core operations.
- Compact design saves shopfloor real estate, freeing up space for other essential tasks.

Create custom-length paper pads at **speeds up to**

ACHIEVE SUSTAINABILITY GOALS

The final shape of the TigerPad® paper pads delivers high protective performance. The paper is made from 100% recycled fibres (85% post-industrial, 15% post-consumer). It can be reused or kerbside recycled. The patented, single-motor is designed to reduce power consumption and to conserve energy.

ELEVATE CUSTOMER EXPERIENCE

Deliver an unboxing experience with paper packaging that showcases your brand and demonstrate a commitment to sustainability that enhances your company's image.

SPECIFICATIONS

Weight	211Kg (system only)
Overall Size	LxWxH 1,34m x 1,06m x 1,76m
Electrical:	230VAC, 50Hz Single Phase, 10A Service
Certifications	CE and CSA approved

Transform your packaging operations with ProPad® Horizontal.
