

ProPad Coiler

A winding system which creates durable paper coils, hands-free.

BENEFITS

Operational Efficiency

- Generates time and efficiency savings over coiling paper pads by hand
- Enables batched coils for efficient transport by cart to pack stations
- Changes coil size and density via intuitive touch screen
- Sequences coil widths and densities for consistent product packouts
- Saves time for operators because coils are secured upon creation

Product Integrity

- Offers robust cushioning protection for industrial packaging environments
- Cushions a wide range of products, from a lightweight to heavyweight

Package Optimisation

- Ensures the right coil specifications for a wide range of SKUs by easily adjusting coil density and width

Brand Experience

- Can contribute to sustainability goals with kerbside recyclable and 100% recycled paper-based coils and FSC® certified.

CHALLENGE

In industrial and fulfillment environments, companies need sustainable alternatives to foams and films, without compromising performance. However, it's been challenging to meet this need when it comes to the heavy cushioning solutions widely used to protect automotive, machinery, appliance, and HVAC parts. Plus, with labour optimisation an ongoing concern for manufacturers, any new packaging equipment needs to be versatile, easy to use, and easy to learn.

SOLUTION

The SEALED AIR® brand ProPad Coiler is an accessory to the SEALED AIR® brand ProPad paper cushioning system that allows hands-free creation of durable, kerbside-recyclable coiled paper pads. The result is a high-protection, recyclable and 100% recycled solution for any packaging operation. The ProPad Coiler creates efficiency and versatility in packaging operations through batched coils, easy size and density change over, and on-demand coiling—all from the same system.

ProPad Coiler

ProPad Coiler cushioning - industrial application

ProPad Coiler winding system

ProPad Coiler cushioning supporting 1.4 - 9.1 kg weights

Close-up ProPad Coiler

SUSTAINABILITY

- Robust recyclable paper coils can replace foam and film packaging offerings in the automotive, machinery, and appliance markets
- All output coils are kerbside recyclable

MATERIAL

- Engineered for use with SEALED AIR® brand 73.5 cm width paper FanFold and Rollstock (1 and 2 ply)
- Creates a range of paper coils wound 30.48 - 60.96 cm in diameter, adjustable every 2.54 cm
- Three coil densities available
- Available in natural kraft paper

EQUIPMENT

- The ProPad Coiler must be used with the ProPad base unit
 - Footprint (LxWxH): 180 cm x 113 cm x 190.5 cm, including ProPad base unit
 - Weight: 154 kg
- Glue dot technology ensures that coils remain tightly compacted, for consistent cushioning
- Additional available accessories include the ProPad FanFold cart, foot switch and coil bin

APPLICATION

- Ideal for 3rd Party Logistics, fulfilment centres
- Suitable for an assortment of applications requiring heavy cushioning such as:
 - Aftermarket industrial parts
 - Automotive
 - Electronics
 - Industrial Supplies
 - Warehousing and Transport
