**FLEXIBLE PACKAGING:  
REVOLUTIONIZING  
THE FOOD SERVICE  
INDUSTRY**

# — REVOLUTIONIZING THE FOOD SERVICE INDUSTRY

Switching from traditional rigid containers to innovative flexible packaging is a forward-thinking choice for **food service operators and food processors** aiming to enhance efficiency, embrace sustainability, and stay ahead in a competitive market. Discover how CRYOVAC® non-shrinkable rollstock systems can simplify your transition from rigid containers to flexible packaging and explore the benefits it can bring to your business.

# CRYOVAC® VPP - Vertical Pillow Pouch

Effortlessly package hot or cold liquids, solid-liquid blends, and pumpable or pourable foods like soups, sauces, condiments, side dishes, and cooked ground meats with precision. These advanced films are designed to meet the varied demands of food service professionals, offering both functionality and reliability.

## OPERATIONAL EFFICIENCY

Designed with efficiency and functionality in mind, our innovative packaging solutions offer nearly **100% product yield**, ensuring minimal waste and maximum value. These lightweight options **significantly reduce shipping weight** compared to bulky cans while providing increased **storage savings** compared to rigid containers.

Additionally, the easy-to-identify, open, handle, and dispense design **simplifies operations for food service distributors and manufacturers**, making day-to-day tasks effortless.

## PRODUCT INTEGRITY

Designed for food service distributors and manufacturers, these packs offer a variety of **barrier properties to protect and extend product shelf life**. They effectively seal through product contamination, while providing superior **protection against punctures and abrasions**, ensuring excellent product integrity during frozen distribution cycles.

## BRAND EXPERIENCE

VPP packaging solutions **preserve taste, moisture, freshness, and texture** for a consistent eating experience. Perfect for food service distributors and manufacturers, this packaging ensures **reliable performance**, builds brand loyalty, and drives sales.

With surface printing, it provides an excellent product display for retail and food services. An easy-open tear notch adds convenience, making it a smart choice for your business.

## CRYOVAC® FlexPrep™ Portion Dispensing

CRYOVAC® FlexPrep™ is a convenient condiment dispensing system by Sealed Air, featuring flexible pouches compatible with a custom dispenser. It offers **cost-effective portion control, extended shelf life, and improved efficiency for sauces and dressings.** Available in various sizes, FlexPrep **streamlines back-of-house operations for food services.**

### OPERATIONAL EFFICIENCY

Innovative condiment solutions can boost your restaurant's efficiency by **cutting packaging waste by 85%, reducing shipping case size by 35%, and improving product yield rates up to 98%.** With portion-controlled dispensing, you will minimise waste, save costs, and improve operations.

### PRODUCT INTEGRITY

Ensure kitchen safety and efficiency with systems that **prevent cross-contamination, protect ingredient freshness, and reduce workplace hazards.** These solutions maintain flavour consistency, minimize spoilage, and **support high-quality standards for food service operations.**

Take advantage of **CRYOVAC<sup>®</sup>** comprehensive liquid packaging solutions, offering a seamless blend of materials, equipment, services and dispensers.

**HIGH-QUALITY CRYOVAC<sup>®</sup> PACKAGING MATERIALS**

**STATE-OF-THE-ART CRYOVAC<sup>®</sup> EQUIPMENT**

**EXPERT TECHNICAL SUPPORT AND SERVICE**

**WIDE RANGE OF DISPENSER SOLUTIONS**

**Designed to meet the needs of food service providers and food processors alike.**

## CRYOVAC® Form-Fill-Seal Equipment

Offers industry-leading versatility and flexibility depending on processor's requirements, food type and viscosity, pouch properties and size, desired speed, and the need for fitments.

### CRYOVAC® 2045

Economical, fully automated system packaging from 300 ml to 5 liters with 30ppm speed.

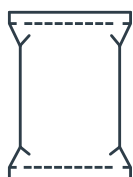

### CRYOVAC® 3002

High-speed packaging from 90 ml to 8 liters. Pouches with fitments.
