2026 FACT SHEET

What We Do

We are a leading global provider of packaging solutions that integrate sustainable, high-performance materials, automation, equipment and services. Sealed Air designs, manufactures and delivers packaging solutions that preserve food, protect goods and automate packaging processes.

Our History

Seeking to create a textured wall covering, in 1957 Alfred W. Fielding and Marc Chavannes laminated two sheets of plastic together trapping air bubbles in between. Though it failed as home decor, the material proved useful as a protective packaging material for small parcel shipments. Fielding and Chavannes founded Sealed Air Corporation in 1960 with BUBBLE WRAP® brand cushioning as the company's flagship product.

In 1998, Sealed Air acquired the CRYOVAC® brand food packaging business from W. R. Grace, which led to Sealed Air's emergence as the world's leading protective and specialty packaging company.

In 2014, Sealed Air announced its new global headquarters in Charlotte, North Carolina, relocating to a modern, sustainable campus that houses its innovation facilities and corporate offices. Construction began in June 2015, employees moved in by late 2016, and the official ribbon-cutting took place in May 2017 after the campus earned LEED Gold certification.

In 2022, Sealed Air acquired Liquibox, expanding its portfolio in bag-in-box and bulk fluid packaging for dairy, liquid eggs, beverages and oils.

In 2026, Sealed Air became a private company under CD&R, shifting from public to private ownership while continuing to operate as Sealed Air Corporation.

Who We Are

We combine best-in-class material science, service and automation solutions to deliver world-class packaging solutions that solve our customers' most critical packaging challenges.

Our Brands

BubbleWrap® packaging
Materials and equipment solutions for items requiring blocking, bracing, cushioning, void fill, or surface protection throughout the shipping process.

CRYOVAC® food packaging
Materials, sustainable solutions, equipment, and technology to maintain food quality and safety, and minimize waste.

Sealed Air® protective packaging
Engineered protective packaging solutions that enable products to ship faster and arrive safer.

Autobag® automated systems
Automated mailer systems, cartoning systems, and bagging equipment designed for high-productivity packaging.

liquibox® liquid packaging
Materials, dispensers, filling equipment, and sustainable solutions to preserve the integrity of liquid products.

Solving Customer Challenges:

We solve our customers' most critical packaging challenges and deliver solutions for fresh proteins, foods, fluids and liquids, medical and life science, e-commerce retail, logistics and omnichannel fulfillment operations, and industrials.

Our Vision

To become a world-class sustainable and automated packaging solutions provider, partnering with our customers to solve their most critical food and protective packaging needs.

Redefining Packaging:

Our solutions combine:

- Service
- Automation
- Material Science
