BRAND PACKAGING

## Inflatable Bubble HDPE 95% Recycled Content

Inflatable Bubble Packaging Solution

Thin film with a minimum  
95% Recycled Content

## BENEFITS

BUBBLE WRAP® brand Inflatable Bubble HDPE 95% Recycled Content is designed for cushioning and wrapping packaging applications, to secure and cushion goods while in transit, reducing returns and increasing customer satisfaction.

They combine strength, ease of use with decreased dependence on virgin based and improve your sustainability profile while maintaining a high level of protection.

### THIN FILMS WITH RECYCLED CONTENT FOR YOUR PACKAGING OPERATION

With their long roll lengths they make significant strides in operational efficiency. Inflate on demand using the BUBBLEWRAP® brand Flex Inflatable Cushioning system.

## TYPICAL APPLICATIONS

3PL

Electronic

Office Supplies

Work Cell Operations

E-Commerce Packaging

Health & Beauty

Home Goods

## SUSTAINABILITY

### REDUCE

The High Recycled Content material reduces the amount of the virgin resin material sourcing. The Inflatable Bubble Medium HDPE 95% Recycled Content comes with a thickness of 20 microns, so less material is used versus thicker alternative materials. By inflating on-demand, storage space is saved, freight costs are reduced as well as greenhouse gas emissions associated with inbound delivery trucks.

### RECYCLE READY\*

The film is compatible with mechanical recycling streams of HDPE and recyclable in many locations. Recycled material contained in these HDPE Bubble films is certified according to EN15343 which establishes procedures for track and trace of recycled plastic content sourcing and use in product manufacturing.

Film	Width x Perforation x Length	Thickness Microns
Inflatable Bubble Medium HDPE 95% Recycled Content	394 x 335mm x 762 m	20
Inflatable Bubble Medium HDPE 95% Recycled Content	782 x 335mm x 762m	20
Inflatable Bubble Large HDPE 95% Recycled Content	394 x 338mm x 610m	30
Inflatable Bubble Large HDPE 95% Recycled Content	794 x 338mm x 610m	30

\*Degree of recyclability of the final package depends on the specific product configuration or components intended for recycling and the scope and availability of appropriate local recycling facilities.
